

CS 327 – INTRODUCTION TO DATABASES

Spring 2025

PROJECT DELIVERABLE 1

This part of the deliverable will consist of three things.

1. The names of the group members of your group. Only one person in each group needs to submit the project-related assignments.
2. A neatly drawn ER/EER Diagram representing the VideoStore system. **It must be drawn using some electronic tool.** You can use the drawing tools in Word/Powerpoint, or Microsoft Visio if you have access to it. You can also use the website/online tool draw.io for this purpose.
3. A list of all assumptions made while drawing this EER Diagram. See project description uploaded earlier for details on the assumptions.

This deliverable is due on Friday, March 7 before midnight.
